

safely. The petitioner proposes to establish evaluation points to measure the quantity and direction of airflow entering and leaving each airway in the affected area; to have a certified person examine the check points on a weekly basis and record the results in an approved record book; to provide a date board at the evaluation points; to maintain the evaluation stations and the approaches to the station in safe condition; and to investigate immediately any change in air quantity and quality. The petitioner states that application of the standard would result in a diminution of safety to the miners. In addition, the petitioner asserts that the proposed alternative method would provide at least the same measure of protection as would the mandatory standard.

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of availability of draft environmental impact statement.

SUMMARY: Pursuant to the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA (40 CFR parts 150-1508), and NASA policy and procedures (14 CFR part 1216, subpart 1216.3), NASA has prepared and issued a draft environmental impact statement (DEIS) for the proposed Aerodynamics Testing Program at Ames Research Center (ARC), Moffett Field, California. This document serves as a programmatic environmental impact statement for proposed wind tunnel testing of high performance aircraft in the National Full-scale Aerodynamics Complex (NFAC) at ARC.

DATES: Comments on the DEIS must be provided in writing to NASA on or before August 14, 1995 or 45 days from the date of publication in the **Federal Register** of the U.S. Environmental Protection Agency's notice of availability of the Ames Research Center Aerodynamics Testing Program DEIS, whichever is later.

FOR FURTHER INFORMATION CONTACT: Sandy Olliges, 415-604-3355.

SUPPLEMENTARY INFORMATION: The overall purpose of the proposed ARC Aerodynamics Testing Program is to support the development of future generations of civilian and military aircraft through large- and full-scale wind tunnel testing of these aircraft and aircraft components. The Aerodynamics Testing Program would occur in the 40- to 80-Foot Wind tunnel and the 80- by 120-Foot Wind Tunnel of the NFAC. The DEIS considers the alternatives associated with the proposed Aerodynamics Testing Program and their related environmental impacts. Potentially significant impacts of the proposed action and reasonable alternatives are principally related to an increase in noise and vibration. The first proposed tests under the Aerodynamics Testing Program in the NFAC could begin in early 1996.

Public meetings will be held in late July or early August, 1995. The specific meeting time(s) and location(s) will be published in the San Jose Mercury News and the La Oferta Review. The meeting schedule can also be obtained from Sandy Olliges at the address or telephone number stated above.
